**HISTORY**

NeXT overhauled their entire line, introducing the NeXTstation as a smaller, less costly alternative to the Cube. At just under \$8,000, it offered Quadra 900 speed at about the same price as a Mac IIfx 4/80 with a 13" color screen. And the NeXTstation included more memory, a larger hard drive, a 16" color display, and ethernet (the IIfx still used LocalTalk). A 33 MHz "Turbo" version was also available.
