HISTORY

The J700 was Umax's least expensive computer to use the 604e processor. Very expandable, it has 4 PCI slots, 5 drive bays, 8 DIMM sockets, and a replaceable CPU. In fact, the motherboard is the same as that in the S900 except that only 4 of 6 PCI slots are installed and the second processor slot hasn't been installed. This means it should be possible to have a 6 slot, 2 processor computer by upgrading to the S900 motherboard.
