Document Conventions

These tables list conventions used throughout this guide.

Icon	Notice Type	Description
	Information note	Information that contains important features or instructions.
	Caution	Information to alert you to potential damage to a program, system, or device.
	Warning	Information to alert you to potential personal injury or fatality. May also alert you to potential electrical hazard.
	ESD	Information to alert you to take proper grounding precautions before handling a product.

Convention	Description
Text represented as a screen display	<i>This typeface</i> represents displays that appear on your terminal screen, for example: <code>Netlogin:</code>
Text represented as commands	This typeface represents commands that you enter for example: <code>setenv TCMHOME directory</code> <i>This guide always gives the full form of a command in uppercase and lowercase letters. However, you can abbreviate commands by entering only the uppercase letters and the appropriate value. Commands are not case-sensitive.</i>
Text represented as menu or sub-menu names.	This typeface represents all menu and sub-menu names within procedures, for example: On the File menu, click New .

**Product
Description**

The Dual T1 DS-1 Network Interface Card (NIC), also known as the Long Haul NIC, performs critical functions of a channel service unit (CSU) within the 3Com Total Control Enterprise Network Hub.

Used in conjunction with the Dual T1 Network Application Card (NAC), the DS-1 NIC terminates two T1 span lines that equate to 48 DSOs. This NIC supports span lengths of 655 feet or greater.

**Product
Compatibility**

The Dual T1 DS-1 NIC is compatible with the following NACs:

- Dual T1/E1 (186-based)
- Dual PRI (386-based)

2

INSTALLATION

This chapter contains Dual T1 DS-1 Network Interface Card (NIC) installation information.

Installation Tools

To install this NIC in the Total Control chassis, you need a #2 Phillips and flat-head screwdriver.

Installation Procedure

To install this NIC:

ESD: To reduce the risk of electrostatic discharge (ESD), take proper grounding precautions before handling the NIC.

Install the NIC with or without power applied to the chassis.

1 Configure the NIC via the jumpers.

For proper operation, confirm that the 10-position jumper is at **NORMAL**.

- 2 Select a slot at the rear of the Total Control chassis for installing the NIC.
Install this NIC in slot(s): 1–17

For managed chassis, slot 17 is reserved for the Network Management Card (NMC) NIC.

- 3 Use a #2 Phillips screwdriver to remove the safety panel covering this slot.

- 4 Insert the NIC between the slot's upper and lower card guides.

- 5 Slide the NIC into the chassis, until the front of the NIC is flush with the chassis.

- 6 Use a flat-head screwdriver to tighten the screws on the front panel.

- 7 Cover any unused chassis slots with safety panels.
- 8 Install the Network Application Card (NAC) corresponding to this NIC. Refer to the NAC's Getting Started Guide for more information.

3

NETWORK INTERFACE CARD CABLING

This chapter provides information about the physical interfaces of the Dual T1 DS-1 Network Interface Card (NIC) and instructions for accessing the corresponding Network Application Card (NAC) through the user interface (UI).

Physical Interfaces

The Dual T1 DS-1 NIC has the following physical interfaces:

Callout Number	Interface Description
1	RS-232: RJ-45 RS-232 port <ul style="list-style-type: none"> Connect to this port to access the corresponding NAC's UI console. This port's speed is determined by DIP switch settings on the NAC.
2	MON1: Bantam Jack <ul style="list-style-type: none"> Connect span line monitoring equipment to this port for span 2 diagnostics.
3	MON2: Bantam Jack <ul style="list-style-type: none"> Connect span line monitoring equipment to this port for span 1 diagnostics.
4	Span 1: RJ-48C E1 Span Line 1 Interface <ul style="list-style-type: none"> Connect the T1 span line to this port.
5	Span 2: RJ-48C E1 Span Line 2 Interface <ul style="list-style-type: none"> Connect a secondary T1 span line to this port.

Accessing the User Interface

To access the UI of the corresponding NAC, connect the following cables to the NIC's console port.

Callout Number	Description
1	RJ-45 connector to NIC's console port
2	DB-25 male connector to modem for remote operations
3	DB-25 female-to-female null modem adapter to PC or terminal COM port

Regulatory Compliance Statements

United States

FCC Part 15 Compliance Statement

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Interface Specifications

Serial Ports

Electrical Specification: RS-232-C (EIA/TIA-232-E standard)

Connector: RJ-45, 8 position modular jack

Configuration: Data Terminal Equipment (DTE)

Transmission Method: Unbalanced RS-232

Transmission Rate: 38,400 bps maximum

Span 1 Port

Electrical Specification: T1/E1 span line interface

Connector: RJ-48C, 8 position modular jack

Specifications:

■ I.431/ETSI ETS 300 011	■ AT&T Pub 62411	■ ITU G.823
■ ANSI T1.403	■ ITU G.736	■ ETSI 300-233
■ ITU G.703	■ ETSI 300-166	■ TBR-12
■ ITU G.775	■ ANSI T1.408	■ TBR-13

Channelized T1 (CH T1) and T1/PRI Application

Framing:

- Super Frame (SF), also known as D4
- Extended Super Frame (ESF)

Line Coding:

CH T1

- Binary Eight Zero Code Supression (B8ZS)
- Alternate Mark Inversion (AMI)
- Zero Code Supression (ZCS)

T1/PRI

- B8ZS

Interfaces:

DS1 (Long Haul Applications)

- Connecting CPE equipment to the Telco's T1 or Smart Jack up to 6000 feet away

Current Draw

+5.2 vDC @ 500 mA typical maximum

*Typical maximum refers to the maximum current draw under most typical configurations.*

Environment**Shipping and Storage**

Temperature: -25 to 75° C, -13 to 167° F

Relative Humidity: 0 to 100%, Non-condensing

Operating

Temperature: 0 to 40° C, 32 to 104° F

Relative Humidity: 0 to 95%, Non-condensing

Physical Dimensions

	Inches	Centimeters
Length:	5.30	13.46
Width:	0.79	2.00
Height:	6.90	17.53

Monitor Port

Connector: Bantam Jack

Configuration: Non-intrusive Bridge Mode

Isolation Resistance: 430 ohms

Attenuation: -6 to -10 dB
